WHAT IS CLAIMED IS:

1. A method for processing one or more mail pieces, comprising:

receiving a postage amount entered by a user, said postage amount to be applied to said one or more mail pieces;

searching stored information including one or more rate tables for one or more classes of service having a postage rate that matches said postage amount;

displaying said one or more classes of service to said user;

receiving a selected class of service, said selected class of service being selected by said user;

applying said postage amount to said one or more mail pieces; and storing transaction information for each of said one or more mail pieces, said transaction information including said postage amount and said selected class of service.

- 2. A method according to claim 1, wherein said one or more classes of service having a postage rate that matches said postage amount each have a weight that corresponds to said postage amount, said transaction information further including said weight for said selected class of service.
- 3. A method according to claim 2, said displaying step further comprising displaying each of said weights along with said one or more classes of service.
- 4. A method according to claim 2, wherein said selected class of service and said weight for said selected class of service are applied to said one or more mail pieces.
- 5. A method according to claim 1, further comprising prompting said user to indicate a desire to have a class of service associated with said postage amount, and proceeding to said searching step only if said user provides an indication of said desire.

- 6. A method according to claim 1, wherein said selected class of service is applied to said one or more mail pieces.
- 7. A method according to claim 1, said one or more mail pieces comprising a batch of mail pieces.
- 8. A mail processing system, comprising:

a metering/printing module for applying postage values to one or more mail pieces;

a display;

a central processing unit controlling operation of said metering/printing module and said display; and

a memory storing information including one or more rate tables and software executable by said central processing unit, said software including instructions for:

- (a) receiving a postage amount entered by a user, said postage amount to be applied to said one or more mail pieces;
- (b) searching said information for one or more classes of service having a postage rate that matches said postage amount;
- (c) displaying said one or more classes of service on said display;
- (d) receiving a selected class of service, said selected class of service being chosen by said user;
- (e) causing said metering/printing module to apply said postage amount to one of said one or more mail pieces or a tape to be applied to said one

(10018916.1.)

or more mail pieces; and

- (f) storing transaction information for each of said one or more mail pieces, said transaction information including said postage amount and said selected class of service.
- 9. A mail processing system according to claim 8, wherein said one or more classes of service having a postage rate that matches said postage amount each have a weight that corresponds to said postage amount, said transaction information further including said weight for said selected class of service.
- 10. A mail processing system according to claim 9, said instructions for displaying further comprising instructions for displaying each of said weights along with said one or more classes of service.
- 11. A mail processing system according to claim 8, said one or more mail pieces comprising a batch of mail pieces.
- 12. A mail processing system according to claim 8, said software further including instructions for prompting said user to indicate a desire to have a class of service associated with said postage amount, said central processing unit executing instructions (b) through (f) only if said user provides and indication of said desire.
- 13. A mail processing system according to claim 8, further comprising an input device for enabling said user to enter said postage amount and choose said selected class of service.
- 14. A mail processing system according to claim 8, said instructions for causing further comprising instructions for causing said metering/printing module to apply said selected class of service to one of said one or more mail pieces or a tape to be applied to
